TITLE	School Profiles, 1981, 1982.
INSTITUTION	New York City Board of Education, Brooklyn, N.Y.
PUB DATE	83
NOTE	1,394p.
AVAILABLE FROM	For public service organizations: Florence Adler, New York City Board of Education, 110 Livingston Street, NY, NY 11201 (no charge); for individuals: Publications Office, New York City Board of Education, Room 126, 110 Livingston Street, Brooklyn, NY 11201 (write for price).
PUB TYPE	Statistical Data (110) -- Reference Materials - Directories/Catalogs (132)
EDRS PRICE	MF11/PC56 Plus Postage.
DESCRIPTORS	Attendance; Class Size; Elementary Secondary Education; Enrollment; Ethnic Groups; Facilities; *Institutional Characteristics; Mathematics Achievement; Operating Expenses; Reading Achievement; School Statistics; Socioeconomic Status; Staff Utilization; *Student Characteristics; Student Promotion; Student Teacher Ratio; Urban Schools
IDENTIFIERS	*New York City Board of Education

ABSTRACT

This publication presents a statistical overview of each elementary, intermediate, junior high, senior high, and special education school in the New York City public school system for the 1981-1982 school year. Data are provided on physical facilities, pupil enrollment, ethnic composition, class size, student promotion, Title I status, free lunch eligibility, norm aid to families with dependent children, attendance, admissions and departures, and standardized achievement test scores in reading and mathematics. Also provided are data relating to city school graduates, average high school class size, and number of instructional periods in the high schools, as well as school staff position and cost data. FOREWORD

The purpose of the SCHOOL PROFILES is to provide information and data to support the school system's educational goals for all students in the New York City public schools.

The SCHOOL PROFILES provides detailed information about New York City public schools to Board of Education professional staff and the public: parents, interested citizens, organizations, and members of the educational community. This publication presents a statistical overview of each elementary, intermediate, junior high, senior high, and special education school in the New York City public school system for the 1981-1982 school year. This edition of SCHOOL PROFILES also includes citywide information on school registers, pupil ethnic composition, attendance, promotions, graduation, and reading scores for the past several years.

A school is a complex organization, and efforts to characterize schools by the use of quantitative data are never complete. The factors selected for inclusion in the SCHOOL PROFILES are thought to be most indicative of the total school environment and of greatest concern to the educational community. Some factors, such as average daily register and pupil attendance data, are based on a year's experience. Other variables, such as ethnic composition of the student population and pupil/teacher ratio describe the schools at a point in time.

A number of the major problems encountered in urban education today deal with the management of a highly complex system to insure the effective support and delivery of instruction. With stringent budgets, increasing expectations, and a growing population of disadvantaged and mobile students, urban school personnel are continually confronted with the need for accurate and timely information on instructional activities and supportive services. Information on educational resources, curriculum and student achievement can provide a basis for upgrading and developing new instructional programs.

Anthony J. Alvarado
Chancellor

ACKNOWLEDGEMENTS

This volume of School Profiles was prepared by the Office of Student Information Services, using pertinent school data from various sources. The data on physical facilities, pupil enrollment, ethnic composition, class size, promotions, ESEA Title I status, free lunch eligibility, norm aid to families with dependent children, attendance, admissions and departures, and standardized achievement test scores in reading and mathematics were collected and generated for the purposes of this report by the Office of Student Information Services.

Data relating to graduates, average class size, and number of instructional periods in the high schools were obtained from the Division of High Schools. School staff position and cost data were generated by computer systems developed by the Office of Student Information Services.

Production of the 1981-1982 School Profiles was under the direction of Anna Elman, the Administrator of the Educational Management Information Unit at the Office of Student Information Services. Leon Brazel, with the assistance of Florence Adler coordinated the data gathering and data processing activities, and edited the final draft of this document. Yitzchak Schneider generated the computer programs and output. April Singer produced the cover design and the maps. Marcella Davis provided typing assistance.

STUDENTS IN NEW YORK CITY PUBLIC SCHOOLS, 1970 - 1981

DISCUSSION OF DATA

I. Enrollment (Tables I - III)

From 1971-72 to 1981-82, enrollment in the public school system declined from 1,149,068 to 925,365, a drop of 19.5%. The elementary schools accounted for most of the decline. Elementary enrollments dropped steadily throughout this period from 611,430 in 1971 to 429,698 in 1981.

In 1981-82 there was an increase in enrollment over 1980-81 in each grade from Pre-K to 2. Enrollment in grade 1 has risen in each of the last two years. The increases are small in comparison to the preceding decreases.

In intermediate/junior high and high schools, the situation is quite different. Neither level of schooling experienced an enrollment decline until the mid-1970's, but decline since then has been considerable. The promotional gate at grade 7 appears to have temporarily arrested the decline in intermediate/junior high school enrollments. High school registers continue to decline, despite an increase in outreach and other programs aimed at the dropout population.

Special education enrollments have risen sharply, both in regular schools and in special schools. The number of students in programs for the mentally handicapped has fallen*, while programs for all other categories of handicap have expanded.

The enrollment declines since 1970 have affected community school districts very unequally. Districts 10 and 24 had greater enrollment in 1981-82 than in 1970-71, while in District 6, the 1981 enrollment was only slightly lower than in 1970-71. A number of districts have had to cope with increases followed by decreases. The most striking example is District 9. Districts 5, 7, 12 and 23 lost over half their enrollments; Districts 1, 3 and 26 lost over 40%. District 16 was sharply affected both by population loss and by the creation of District 32 in 1973.

II. Pupil Ethnicity (Tables IV - IX)

The annual pupil ethnic census in the New York City public school system is based on teacher judgment of the ethnic category of each student. The categories are those established by the federal Office for Civil Rights: American Indian or Alaskan Native; Asian or Pacific Islander; Hispanic; Black, not of Hispanic descent; Other (usually interpreted as White). No individually identifiable data are collected: totals are reported for each homeroom.

*It should be noted that programs for "brain-injured" are classified as programs for the physically handicapped, not mentally handicapped.

Whites were the largest group of students in 1970. By 1981 they were third largest. The percentage of children identified as white fell from 37.8% in 1970 to 25.9% in 1981, a decline of approximately one percentage point a year. The number of white students fell by nearly half, from 431,241 to 239,496. Whites remain in the largest group in Queens, and are about 80% of the school population in Staten Island.

The black population rose from 392,714 in 1970 to 410,321 in 1975. Blacks became the largest group in 1972. Since 1975 the black population has fallen to 356,441 and the percentage of students identified as black has risen to 38.6%. There has been virtually no change in this proportion since 1978. Blacks are the largest group in Brooklyn, and second largest in all other boroughs.

Until 1977, the Hispanic population was reported in two categories: Puerto Ricans and other Spanish. In 1978 the two groups were combined for reporting purposes. Coincidentally, Hispanics became the second largest group in that year. The total Hispanic population peaked in 1976, at 312,372. By 1979, the Hispanic enrollment declined to 286,664, a level from which there has been little change. As the numbers of black children and white children have declined, Hispanics are a rising proportion of the total, 31.1% in 1981. Hispanics are the largest group in Manhattan and the Bronx, and second largest in Brooklyn. Queens is the only borough where Hispanic enrollments are rising.

The Asian population in the school system has more than doubled since 1970, from 17,491 to 40,626. It is the only group which is rising in enrollment. Citywide, Asian children were 4.4% of the total in 1981. They were 7.8% of student population in Queens and 7.4% in Manhattan. Pupil ethnic composition by borough is presented in a more detailed report available through the Office of Student Information Services.

III. Pupil Attendance (Tables X - XIII)

In 1981-82, the pupil attendance rate for the New York City Public Schools was 84.3%. Attendance was highest in elementary schools, at 88.8%, followed by intermediate/junior high schools (84.6%). High School attendance was 77.3%, and attendance in special schools was 71.0%.

The attendance rate has changed very little over the last four years. The rate was 84.2% in 1978-79, 84.3% in 1979-80, 84.2% in 1980-81, and 84.3% in 1981-82. This recent pattern is a slight but notable improvement over the preceding years when attendance was in the 82% - 83% range. Some but not all of the improvement can be attributed to a change in high school attendance regulations regarding Regents' week attendance.

While attendance rates are generally stable, there are some indications of trends. In general, attendance appears to be rising in the high attendance districts. Some districts appear to be on a downward trend in attendance.

In the high schools, attendance is rising noticeably in Manhattan and Richmond, and falling in Queens. Vocational high schools as a group are experiencing a sharp decline, from 82.3% attendance in 1978-79 to 80.0% in 1981-82. Alternative high school attendance rose in 1981-82 by two percentage points over the level of the previous three years.

In examining Tables X - XIII, it should be noted that aggregate attendance trends are difficult to interpret because a large percentage of days absent are contributed by a small number of students who tend to be absent a great deal of the time, and by students who have left the school but are still on teacher rollbooks. Additional information on 1981-82 attendance, including attendance information by borough, is available in a more detailed report, which also includes a discussion of the relationship between district poverty rates and district attendance rates.

IV. Test Results (Table XIV)

This table summarizes pupil performance on tests in reading for students who were tested in grades 2 - 9 in elementary, intermediate and junior high schools.

The data in the table should be interpreted with caution, as the test battery was changed three times during the period. The Citywide since 1978 has been the California Achievement Test, so that comparisons since 1978 are meaningful. C.A.T. scores rose each year except 1979, when the test was given under adverse conditions: an emergency testing after another test battery was found to be unsatisfactory. In 1982, 51.0% of tested students performed at or above grade level on the C.A.T. It is interesting to note that there was no change in performance on the Citywide between 1971 and 1974, another extended period when one test battery was used.

While we cannot make conclusive statements about the actual gain in reading performance of the elementary and junior high school students, the trend shows that the students tested have come closer to the national reading average as of the time of testing, and that there clearly has been an improvement in the reading performance of our pupils in grades 2 - 9 since 1978.

V. Promotions (Table XV)

Promotion rates as well as test results are indicators of pupil achievement in the school system. Promotion rates, however, are affected by changes in promotional policy promulgated by central administration, and the degree to which the policy is being implemented in individual schools and districts.

Table XV illustrates promotion rates for the past 10 years. The trend shows that promotion rates in elementary, intermediate and junior high schools have been declining gradually over the past decade.

As a result of a new Promotional Policy, gates were established in grades 4 and 7 in June 1981. A considerably greater number of students were held back in these grades in 1981 and 1982. In non-gates grades, promotion rates are continuing the pattern of very gradual decline. Even in grades 5

and 8, in which promotion rates might have been expected to rise, the percentage of students promoted in 1982 was lower than in 1980.

VI. Graduates
(Table XVI)

The number of students graduating from high schools has fallen from 46,940 in 1976-77 to 43,437 in 1981-82, a drop of 3,503 or 7.5%. Over the same period, total high school register fell by 10.1%, from 319,879 (1976-77) to 287,441 (1981-82). These data suggest that the change in the number of graduates is generally consistent with the change in enrollment.

VII. Dropout Rates in New York City High Schools
(Table XVII)

Four categories of discharge were considered to be dropout categories for school years up to and including 1981-82:

- Over 17, discharged with parental consent
- Discharged with employment certificate
- Not found after search by the Bureau of Attendance
- Married

A projected four-year dropout rate is reported using procedures developed in the 1979 Dropout Report.

Despite the obvious interest of year-to-year comparisons, they should be made with extreme caution, as dropout data have been only partially audited, and the method of collecting the information has changed over the years. In 1981-82, for the first time, dropout statistics were fully based on submissions to a computerized data system, the OSIS Biofile. In earlier years, the dropout statistics were based on manual tabulations produced by the Bureau of Attendance.

Substantial changes in the method of reporting dropouts are planned for 1982-83. These changes will bring the school system's definition much closer to that of the State Education Department. A more detailed report which reflects the numbers and percentages of dropout students on the level of borough and individual schools is available through the Educational Management Information Unit at OSIS. The report also includes a discussion of issues and plans concerning dropout data.

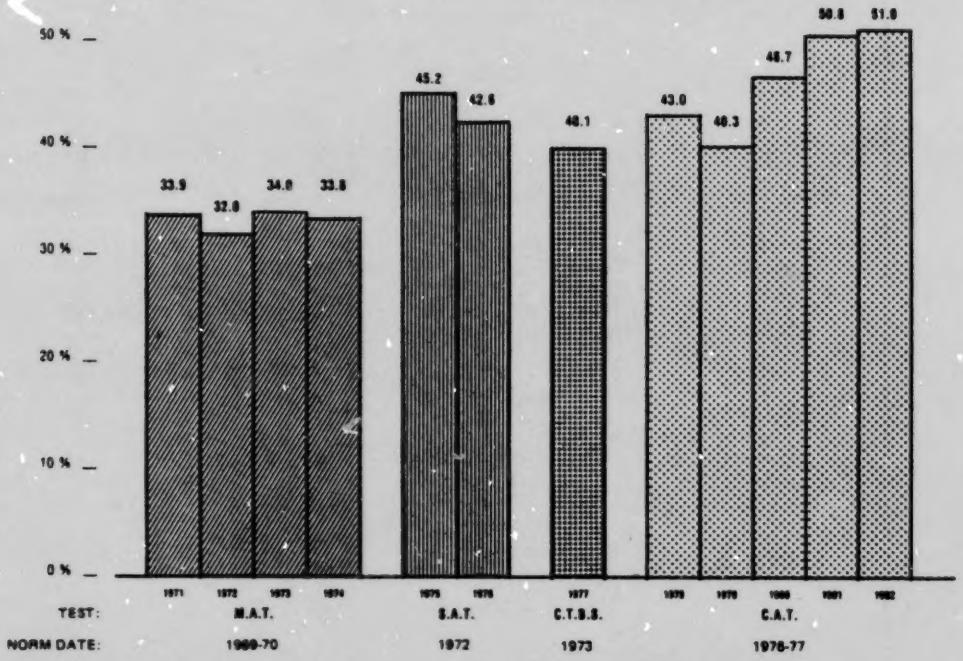
TABLE XIV

PERCENT AT OR ABOVE GRADE LEVEL CITYWIDE
SPRING 1971 - SPRING 1982
READING



Population Tested: Students in grades 2-9 with the following exceptions: ninth graders in high schools, exempt Limited English Proficient Students, exempt Special Education Students.
NOTE: Exempt Limited English Proficient Students were included in percentages as having scores below grade level. Percentages do not include Special Education Students. The policy for testing Limited English Proficient Students has varied from year to year. District 3 did not participate in the administration of the reading test in 1979.

In addition, from 1971-1982, four different test instruments were used. Direct comparison should not be made between results on different tests. Please note in 1979, a year of apparent decline, the test administration took place in June (not the typical test month). Lower student scores may reflect the emergency test conditions.

M.A.T. - Metropolitan Achievement Test
S.A.T. - Stanford Achievement Test
C.T.B.S.- California Test of Basic Skills
C.A.T. - California Achievement Test

NB. Data on High School Graduates are collected by the High School Division. The reported total of graduates excludes recipients of Special Education Certificates or High School Equivalency diplomas.

The definition of "graduation candidates" and "graduates" varies somewhat from year to year because of the treatment of former students who complete their diploma requirements elsewnere and return to their home school for graduation. After June 1979, former students were counted as candidates only if they actually received diplomas.

Projected 4 year Dropout Rate			44.3**			47.3			46.8			45.0

*Dropout data were not available for alternative high schools for 1977-78 and 1979-80. Dropouts were estimated for these years as 42% of register.

Source: OSIS (1981-82, part of 1979-80); Bureau of Attendance (other years)

**The Dropout Report (1979) reported figures of 45,043 (dropouts), 313,468 (register), 14.4% (percentage) and 46% (rate). That document included those high school programs which enroll students who have already dropped out. This report excludes such programs.

NOTE: Beginning in 1981-82, data were collected on students who re-entered the school system after having been discharged with a "dropout" discharge. 3,827 such students were identified for 1981-82.

BASIS - Combines Staten Island and parts of Brooklyn. The remaining Brooklyn High Schools report to the Superintendent for Brooklyn.

1981-1982 SCHOOL PROFILES

DATA SOURCES AND DEFINITIONS

PHYSICAL FACILITY DATA

The following physical facility data are included for each school:

LEVEL

Level defines a category of schools having similar grades or types of pupils. For the SCHOOL PROFILES the following levels have been used:

Community School Districts 1 through 33
- Elementary Schools
- Junior High/Intermediate Schools

Special Education District 75:
- School for the Deaf
- School for Language and Hearing Impaired Children
- Hospital Schools
- Occupational Training Centers
- Schools for Career Development
- Day Schools for the Education of the Emotionally Handicapped
- Institutions for the Emotionally Handicapped
- Other Special Education Centers

High School District 78
- Academic-Comprehensive High Schools
- Vocational-Technical High Schools
- Independent Alternative High Schools
- High School Program for Pregnant Girls
- High School Outreach Program

TITLE I STATUS

A school is eligible to receive additional educational services under Title I of the Federal Elementary and Secondary Education Act (ESEA) if its percentage of low-income pupils is equal to or greater than the citywide percentage of low-income pupils. The percentage of low-income pupils is determined by dividing the school's October 31, 1980 register into the weighted sum of free lunch eligible pupils enrolled in the school and children aged 5 to 17 receiving Aid to Families with Dependent Children (AFDC) payments.

For the 1981-82 school year, the following formulae were used to determine the citywide low income cutoff percentage and the low income percentage for each New York City public school.

1. Citywide Cutoff (C.W.C.)

$$C.W.C. = \frac{\text{The number of Children Ages 5-17 on AFDC Welfare Rolls (weighted 60\%) plus the number of Public School Pupils receiving Free Lunch (weighted 40\%)}}{\text{Total number of Children on Public School Registers as of October 31, 1980.}} \times 100$$

2. Eligibility of a New York City Public School (P.S.E.)

$$P.S.E. = \frac{\text{The number of Children in Age Span Appropriate to the School's Attendance Area on AFDC Welfare Rolls (weighted 60\%) plus the number of Pupils in the School receiving Free Lunch (weighted 40\%)}}{\text{Total number of Public School Children registered in the school as of October 31, 1980.}} \times 100$$

A public school is eligible for ESEA Title I services for 1981-1982 if its low-income percentage (P.S.E.) is equal to or greater than the citywide low-income cutoff percentage (C.W.C.) of 45.76%.

ADDRESS

TELEPHONE NUMBER

NO. OF ANNEXES

An annex is an educational space assigned to a school organization but not housed in the main school building. For the SCHOOL PROFILES, only annexes housed in regular school buildings are counted. Annexes housed in portable classrooms, mini-schools or any leased space are not included in the annex data.

YEARS OF CONSTRUCTION, ADDITION AND MODERNIZATION

Dates apply to main building only.

Main building year of construction dates for the various level and district summaries are presented by the number of schools in the summary having construction dates within each of the following intervals:

Before 1900
Between 1900 and 1929
Between 1930 and 1959
1960 and later

TYPE OF CONSTRUCTION

There are four categories of construction for New York City public school buildings:

Fireproof Throughout
Structurally Fireproof
Interior Framing not Fireproof
Mixed (any combination of the above categories)

Main building type of construction data for the various level and district summaries are presented by the number of schools in the summary having construction types within each of the four above categories.

CAPACITY

Capacity is the ideal number of pupils that can be physically accommodated in a school given its educational program. School capacity is computed annually in October based on a survey of the number of instructional rooms and the use made of these rooms. Factors considered in the computation of a school's capacity include the number and type of classes organized, class size requirements for the pupil populations, and special programs and activities. For the SCHOOL PROFILES, the capacity of temporary buildings such as portable classrooms, mini-schools and leased space has not been included with that of the main building and other school building annexes. Capacity is not computed for Special (District 75) Schools or for high school programs other than Academic-Comprehensive or Vocational-Technical high schools.

PERCENT UTILIZATION

Percent Utilization is a measure of the usage of a school building in relation to its rated capacity. Utilization is computed by dividing the October 30, 1981 register into the school capacity as determined by the October 1981 survey. The capacity figure used in the SCHOOL PROFILES excludes the capacity of all temporary buildings in displaying capacity for the school organization. Pupil registers for individual school organizations include all buildings, however. Therefore, for those schools where the register and capacity data do not involve the same structures, the percent utilization has not been calculated. Reference should be made to the following Board of Education publication for a more detailed discussion of school capacity data:

Utilization of School Buildings
1981-1982 School Year
Office of Student Information Services

School Utilization data for the various level and district summaries are presented by the number of schools in the summary having utilization rates within each of the following intervals:

Less than 80 percent
Between 80 and 99 percent
Between 100 and 119 percent
120 percent and over

PUPIL DATA

REGISTER 10/30/81

Register is the number of pupils enrolled in school on the last school day in October. Register includes all pupils (pre-kindergarten, kindergarten, regular and special education classes) counted on the individual school organization's rollbook in all facilities (main building, annexes, portable classrooms, leased space and other auxiliary structures). For many schools, the October 30 register will represent the largest number of pupils within the school at any given point in time during the school year.

AVERAGE DAILY REGISTER FOR SCHOOL YEAR 1981-1982

Average Daily Register is the sum of the daily registers during the school year divided by the number of days in the school year. For 1981-1982 there were 181 school days in Manhattan, Bronx and Staten Island, and 180 school days in Brooklyn and Queens. Since the enrollment at a school will vary continuously with the admissions and departures of pupils during the year, the average daily register may be more indicative of a school's pupil population than is the October 30 register.

ETHNIC COMPOSITION (BY GRADE)

Ethnic Composition is the racial or ancestral composition of the pupil population registered at a school as of October 30, 1981. The pupil ethnic data are collected for each classroom by teacher observation only. Teachers are instructed to include each pupil in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging. The definitions given below are those used by the U.S. Office of Civil Rights:

Black, Not of Hispanic Origin: A person having origins in any of the Black racial groups of Africa.

American Indian or Alaskan Native: A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands or the Indian subcontinent. This area includes, for example, China, Japan, Korea, the Philippine Islands, Samoa, India, Pakistan, Bangladesh and Sri Lanka.

Hispanic: A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin - regardless of race.

White, Not of Hispanic Origin: A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

The pupil ethnic data are displayed by number and percent of pupils across rows for pre-kindergarten, kindergarten, each of the regular grades (1-12), special classes, and total of all grades and classes.

ATTENDANCE (PERCENT OF AVERAGE DAILY REGISTER)

Percent Attendance is the mean pupil attendance rate for the 1981-1982 school year. Percent Attendance is calculated by dividing the average daily register into the average daily attendance. Pupil attendance data are collected monthly for each of ten attendance periods in the school year. Each month's aggregate register and aggregate attendance are totaled over the ten periods and divided by the number of school days in the year to yield average daily registers and attendance.

$$\text{Percent Attendance} = \frac{\text{Average Daily Attendance}}{\text{Average Daily Register}} \times 100$$

Pupil Attendance data for the various level and district summaries are presented by the number of schools in the summary having attendance rates within each of the following intervals:

Less than 60 percent
Between 60 and 69 percent
Between 70 and 79 percent
Between 80 and 89 percent
90 percent and over.

PROMOTIONS (PERCENT OF JUNE 1982 REGISTER)

Promotion rates are provided for elementary, intermediate and junior high schools only. Percent Promotions are calculated by dividing the June 26, 1982 register into the number of pupils promoted in June into a higher grade. Mentally handicapped pupils are not graded and do not "advance" by grade level.

$$\text{Percent Promotions} = \frac{\text{Number of Promotions}}{\text{June 26, 1982 Register}} \times 100$$

Pupil Promotion data for the various level and district summaries are presented by the number of schools in the summary having promotion rates within each of the following intervals:

Less than 80 percent
Between 80 and 84 percent
Between 85 and 89 percent
Between 90 and 94 percent
95 percent and over

FREE LUNCH ELIGIBLES (PERCENT OF 10/30/81 REGISTER)

Percent Free Lunch Eligible Pupils is the number of pupils eligible to receive free lunch and reduced price lunch divided by the October 30, 1981 register. Under U.S. Department of Agriculture regulations, pupils are eligible for free and reduced price school lunches due to low family income or due to special hardship costs (such as excessive medical expenses) where the family income exceeds the U.S.D.A. income scale.

$$\text{Percent Free Lunch Eligibles} = \frac{\text{Free and Reduced Lunch Eligible Pupils}}{\text{October 30, 1981 Register}} \times 100$$

Free lunch eligibility data for the various level and district summaries are presented by the number of schools in the summary having free lunch eligibility rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

ADMISSIONS

Percent Admissions is the number of pupils admitted into a school during the 1981-1982 school year divided by the average daily register for that year. Admissions include both pupils transferring in from another New York City public school and pupils being admitted from all other schools.

$$\text{Percent Admissions} = \frac{\text{Number of Pupils Admitted during 1981-1982}}{\text{Average Daily Register}} \times 100$$

Pupil admissions data for the various level and district summaries are presented by the number of schools in the summaries having admission rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

DEPARTURES

Percent Departures is the number of pupils leaving a school during the 1981-1982 school year divided by the average daily register for that year. Departures include pupils transferring out to another New York City public school, as well as pupils transferring to any other school or leaving school entirely. Departures do not include pupils graduating to the next higher level.

$$\text{Percent Departures} = \frac{\text{Number of Pupils Discharged during 1981-1982}}{\text{Average Daily Register}} \times 100$$

Pupil departures data for the various level and district summaries are presented by the number of schools in the summary having departure rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

NORM AID TO FAMILIES WITH DEPENDENT CHILDREN

Aid to families with dependent children (AFDC) is granted to children deprived of parental care due to death, incapacity or absence, or whose family income is within established financial eligibility guidelines (e.g., the total annual income for a family of four must not exceed $5,712.00).

The Norm AFDC data provided in SCHOOL PROFILES is the number of children of an age appropriate to the grade span of the school whose families live in the attendance zone of the school and receive assistance under the New York City AFDC Program.

1981-82 TEST SCORES

Test scores are shown for the elementary, intermediate and junior high schools based on the tests given to students in grades 2 through 9 on April 26, 1982. The tests used were the California Achievement Test, published by CTB/McGraw Hill and the Stanford Diagnostic Mathematics Test published by the Psychological Corporation. These standardized tests make possible a comparison of the reading and mathematics achievement of New York City public school students with the achievement of students throughout the United States.

Pupil reading scores are reported in grade equivalent units. For each pupil, the number of correct answers is converted to a grade equivalent score on the basis of norms tables developed when the test was standardized on a national sample of students. The ten months of the school year represent tenths of a grade equivalent score. For example, for a third grade test held in April, the norm grade equivalent score is 3.7 because April is the 7th complete month of one year's reading instruction. A third grade pupil who attains a grade equivalent score of 3.7 has equalled the performance, in terms of the number of correct answers, of the average child in the national sample of children on whom the test was standardized. For any large group of pupils tested, there will result a relatively wide range of grade equivalent scores above and below the norm. Statistically, an "average" school should have 50% of its children scoring above grade level and 50% below.

NEW YORK CITY READING TEST

The California Achievement Test for grades 4 through 9 is divided into two parts - Vocabulary and Comprehension. The Vocabulary part contains 30 items that are divided into three sections. The first section requires that students identify the same meaning for an underlined word in a phrase. The second section requires that students identify the opposite meaning for an underlined word in a phrase. The third section requires that students determine the meaning of multi-meaning words by using sentence context.

The Comprehension section of the test contains 40 items based on several reading selections. The test requires that students read a variety of material. Depending on the level of the tests, this material may include biographical sketches, factual accounts, fictional passages, poems, speeches, advertisements, letters, editorials, commercials, or movie reviews. The items measure skills in literal, interpretive, and critical comprehension.

In addition to Vocabulary and Comprehension, students in grades 2 and 3 are also tested in Phonic and Structural Analysis. The Phonic Analysis section contains 25 items that require students to recognize various sounds. The Structural Analysis section contains 11 items that measure skills including word formation, contractions, and identifying base words and affixes.

NEW YORK CITY MATHEMATICS TEST

The Stanford Diagnostic Mathematics Test for grades 2 - 9 is divided into three parts. Part 1, Number System and Numeration, measures understanding of the whole number system and decimal place value, including naming numbers and counting, interpreting numerals, ordering, and rounding. It also includes questions that assess understanding of rational numbers and the properties of the number system and the use of these properties in the operations of addition, subtraction, multiplication, and division.

Part 2, the Computation subtest, is concerned with knowledge of the subtraction, multiplication, and division algorithms and the solution of number sentences.

Part 3, the Applications subtest, measures the ability to select the correct solution model for one-step and two-step problems, to solve two-step and rate problems, and to read and interpret tables and graphs. It also contains questions involving geometric shapes and properties and questions involving measurement, including the metric system.

For each grade tested the following data are reported:

Number of pupils taking the test. This number is generally lower than the pupil register because a certain number of pupils are either absent on the test day or are exempted from testing due to limited English proficiency.

Mean grade equivalent score in reading. This score is calculated by dividing the sum of the individual pupil grade equivalent scores by the number of pupils tested.

Percent of pupils tested scoring at or above grade level.

Percent of pupils tested scoring one year or more below grade level.

Percent of pupils tested scoring two years or more below grade level.

AVERAGE CLASS SIZE

For elementary, intermediate/junior high schools and special education schools, the average class size is the mean number of students in the home rooms or official classes for each grade in the school as of October 30, 1981. Average class size is computed by dividing the number of classes in each grade into the October 30, 1981 register for each grade.

For the academic/comprehensive and vocational/technical high schools, the Division of High Schools has supplied an average class size per school including regular classes, shop subjects, minor music classes and physical education classes.

THE FOLLOWING DATA ARE GIVEN FOR HIGH SCHOOLS ONLY:

PERCENT OF STUDENTS READING 2 YEARS BELOW GRADE LEVEL

The percent of students reading two years below grade level is the number of students in each high school whose score in the California Achievement Test in Reading in April 1982 was 2.0 or more below the norm grade equivalent, divided by the number tested, multiplied by 100. New York State Law requires that pupils with special educational needs (PSEN), defined as students two or more years below grade level in reading and/or mathematics, receive additional remedial services.

STUDENTS IN GRADUATING CLASS

The number of high school students in the graduating class in the Fall 1981 and Spring 1982 terms.

GRANTED DIPLOMAS

The number of students awarded high school diplomas in January and June 1982 and the percentage this number is of the number of students in the graduating class. Does not include former pupils granted diplomas after their classes graduated.

PERCENT OF GRADUATES ATTENDING HIGHER EDUCATION INSTITUTIONS

The percent of the students awarded high school diplomas attending a higher educational institution - four-year college, community college, or other institution.

AVERAGE INSTRUCTIONAL PERIODS

The average number of subject periods taken each day by each academic/comprehensive and vocational/technical high school student including required music and health education courses. This is sometimes called the Curriculum Index.

STAFF DATA

POSITION TITLES

Annual pedagogic positions by title assigned to each school as reported on the pedagogic payroll. Included are all regular, regular substitute, and full time per diem substitute personnel. Excluded are all personnel on sabbatical, terminal, maternity and all other paid and non-paid leaves of absence.

The positions displayed for all schools other than high schools are:

Principal
Assistant Principal (Administration)
Teacher
Guidance Counselor
School Secretary
Other Professional (including Library Assistant, Laboratory Specialist, and Laboratory Technician)

For high schools, there may be three additional position types: Assistant Principal (Supervision), Machinist Helper, and Assistant Stockman.

Position and salary data are provided for each title by tax levy (City) and reimbursable (State and Federal) funding, and total of both funding sources. Average annual salaries are calculated by dividing the total number of positions for each title into the respective total annual salary dollars. All salary information represents totals extracted from the computer payroll files for the school year 1981-1982.

Pupil/Staff Ratio is calculated for each title by dividing the total number of annual positions for the title into the average daily register. Staff Cost per Pupil is calculated for each title by dividing the average daily register into the total annual salary dollars for each title.

All cost data in the SCHOOL PROFILES are for salaries only. Fringe benefit costs, such as City expenditures for health and welfare, social security and pension plans, are not included but are estimated to approximate 36% of pedagogic salaries.

Payroll data do not always provide an exact picture of the number of positions serving in a school. Some personnel charged to one's payroll may actually be assigned to another school or to a district office. Payroll data also do not reflect the assignment status of some acting supervisors. A school in which an assistant principal is serving as an acting principal may be shown as having no principal. Most acting supervisors, however, are paid out of their assignment position payroll line and their status will be shown correctly in the SCHOOL PROFILES.

HOURLY TITLES

Personnel paid on an hourly basis and assigned to schools as reported on the hourly employees payrolls. The hourly positions displayed for all schools are:

-Instructional Paraprofessional (including Teacher Aide, Educational Assistant, Educational Associate, and Auxiliary Trainer)
-Security Guard (Including Student Service Officer)
-Other Hourly (including School Aide, School Lunch Helper, Parent Program Assistant, Family Worker, Family Assistant, and Family Associate)

Hours and annual wages data are provided for each hourly title by tax levy (City) and reimbursable (State and Federal) funding, and total of both funding sources. Average hourly rates are calculated by dividing the total number of hours for each title into the respective total hourly dollars. All hourly staff and salary data are extracted from the computer hourly payroll files for the 1981-1982 school year.

Pupil/Staff Ratio is calculated for each hourly title by dividing the total number of hours for the title into the average daily register. Hourly title cost per pupil is computed by dividing the average daily register into the total hourly dollars for each title.

All hourly cost data provided in the SCHOOL PROFILES are for salaries only. Fringe benefits costs are not included.

STAFF COST PER PUPIL

The total annual pedagogic position and school hourly title salary dollars (excluding fringe benefits) divided by the average daily register.

Total school staff cost per pupil data for the various level and district summaries are presented by the number of schools in the summary having total per pupil staff costs within each of the following intervals:

Less than $1,000 per pupil
Between $1,000 and $1,299 per pupil
Between $1,300 and $1,599 per pupil
Between $1,600 and $1,899 per pupil
$1,900 per pupil and over

PUPIL/TEACHER RATIO

The Pupil/Teacher Ratio data for the various level and district summaries are presented by the number of schools in the summary having pupil/teacher ratios within each of the following intervals:

Less than 15 pupils per teacher
Between 15 and 17.9 pupils per teacher
Between 18 and 20.9 pupils per teacher
Between 21 and 23.9 pupils per teacher
24 pupils per teacher and over

PERCENT OF TEACHERS WITH 5 OR MORE YEARS EXPERIENCE

The percent of regular and regular substitute teachers assigned to a school as of the June 1982 payroll having five or more years of total teaching experience (in either the New York City Public schools or any other school.)

Teacher experience rate data for the various level and district summaries are presented by the number of schools in the summary having percentages of teachers with 5 or more years experience within each of the following intervals:

Less than 50 percent
Between 50 and 69.9 percent
Between 70 and 79.9 percent
Between 80 and 89.9 percent
90 percent and over

REGULAR TEACHERS ON SALARY SCHEDULE

The number and percent of regular and regular substitute teachers assigned to a school as of the June 1982 payroll who are paid on the following salary schedule according to their educational background.

Schedule C-1 - Salary rates paid to teachers who have less than thirty semester hours of approved study beyond the baccalaureate degree. For the 1981-1982 school year, the C-1 salary schedule ranged from $11,821 to $21,500 in sixteen semi-annual steps. In addition, C-1 teachers meeting certain requirements received a promotional differential of $1,575.

Schedule C-2 - Salary rates paid to teachers who have completed thirty semester hours of approved study beyond the baccalaureate degree, or who hold an approved master's degree issued by a recognized college or university. For the 1981-1982 school year, the C-2 salary schedule ranged from $12,404 to $22,089 in sixteen semi-annual steps. In addition, C-2 teachers meeting certain requirements received an intermediate differential of $1,079 and/or a promotional differential of $1,575.

Schedule C-6 - Salary rates paid to teachers who hold an approved doctorate issued by a recognized college or university, or who hold an approved master's degree and in addition have completed thirty semester hours of approved study beyond the baccalaureate degree, or who have completed sixty semester hours of approved study beyond the baccalaureate degree. For the 1981-1982 school year, the C-6 salary schedule ranged from $14,562 to $24,247 in sixteen semi-annual steps. In addition, C-6 teachers meeting certain requirements received a promotional differential of $1,575.

In 1981-1982, teachers with ten years service were given an additional longevity increment of $1,458. Teachers with fifteen years service received $2,916.
